PRODUCT SPECIFIC TRAINING

Page 2

Product specific training is designed to provide pre-job training classes for contractors that are using specialty products that will be used on upcoming projects. To date, this training opportunity has been used by signatory contractors for **Specialized Exterior Panel Training, Solar Training and Cleanroom Training.**

To arrange a training or to learn more about training opportunities please reach out to:

Tom Fischer: tfischer@nasctf.org

Jim Hayes: jhayes@nasctf.org

Ziven Drake: zdrake@nasctf.org

On the Job Training is a program that provides supplemental training for journeymen and apprentices in a job site setting. Our focus is to increase knowledge, skills and abilities in order to be more productive while maintaining high safety standards. A recent pilot program has proven successful on jobs that have requested assistance with drywall production, metal stud framing , doors and hardware, as well as job site planning. Instructors are members with several years of on the job experience.
